

SynthFont – the MIDI file SoundFont player.

© Kenneth Rundt, 2002 - 2021

Version 1.754 released February 19th 2021

Contact me at: info@synthfont.com

Official Web page at: <http://www.synthfont.com>

New in Version 1.754

Bug fixes:

- Some Presets were not correctly played (old error, also found in Viena, SynhFont2, SyFonOne and VSTSynthFont)
- Since version 1.730: you could not play more than one key on the virtual keyboard in the Pianoroll window
- Since version 1.730: the file open dialog for SoundFonts would sometimes crash
- Some reported bugs fixed

Background

SynthFont can be described as a MIDI file player and SoundFont emulator, emulating SoundFont compatible audio cards like Creative's SoundBlaster Live! Series. To use SoundFonts with SynthFont you need only to have a basic audio card installed on your system.

History

SynthFont started off in the year 2000 as a small exercise in learning to understand the structure of SoundFonts. The goal was to learn how to create good quality SoundFonts and to develop a SoundFont editing tool with features not available in other SoundFont editors. In the end the project was divided into two: the SoundFont editor Viena and the MIDI file player SynthFont.

License

This is a freeware version of SynthFont.

If you want to support my work you can either donate a sum of money or help me develop a new feature.

You are free to distribute the unmodified setup file, but note the following:

1. If you want to add it to your own web site I would prefer if you contacted me at first.
2. Copyright must be honored: Kenneth Rundt, 2020, <http://www.synthfont.com>.
3. I would expect you to refer to www.synthfont.com as the home-site of SynthFont.
